

**Amendments to the Specification:**

Kindly amend the specification as follows.

Please replace the paragraph beginning on line 17 of page 16 with the following amended paragraph:

The content access class 530 assists in facilitating searches, discovery, and organization of content. In one embodiment, the content access class 530 content is grouped using a PrefetchContentList command that builds a content list based on preference information corresponding to a particular user. In one embodiment, the preference information is stored within the system 400. For example, the PrefetchContentList command is initiated when a particular user is identified. In another embodiment, the PrefetchContentList command ~~is~~ is initiated and updated during a session with the same user. In some embodiments, prefetching content is performed based on the preferences stored within the content list.

Please replace the paragraph beginning on line 9 of page 19 with the following amended paragraph:

In one embodiment, the media containers 610, 620, 630, ~~640~~ and ~~640~~ ~~650~~ are similar to folders on a conventional computer system and are configured to link to other media containers and/or provide a representation of audio/visual content.
